\*This formula amount is greater than the maximum amount allowed for infants 6-11 months of age.

**Note:** Powder infant formula should be issued in most cases to mostly breastfed infants especially during the first month of life. To issue concentrate or ready-to-feed, use the reconstituted fluid ounces listed on the Infant Formula Ranges Cheat Sheet or in the ND WIC Formula Product Guide to help figure appropriate amounts to issue. Ready-to-feed formula can only be provided for certain reasons – see policy manual or ND WIC Formula Issuance Guide for more information.
